

LeanData, Inc. recruiting Interns

Company Overview:

LeanData, Inc. www.leandatainc.com is an innovative software start up based in Silicon Valley and has raised over \$18 million dollars in venture capital funding. The company was founded by the son of National Taiwan University Alumni who currently work in Taiwan for Academia Sinica. The company has been successful hosting interns from other universities such as National University of Singapore and would like to offer this exciting program to NTU.

Job Description:

LeanData is looking to hire a Full Stack Software Engineering Intern to join our fast paced team that is focused on creating new features for our Salesforce.com SaaS application to make sales and marketing teams successful. You will use Apex, Visualforce, and Ruby on Rails to build powerful features that our product deliver a foundational solution that is instrumental to our customer's success. We're looking for engineers who love to take on responsibility and bring unique ideas to challenging projects.

Skills Requirement:

Students must have some knowledge of either Java or Ruby on Rails
Students must be majoring in **Computer Science or Electrical Engineering**
Students must be proficient in English.

Job Details:

- ✧ 1 year term from August 2017 to July 2018
- ✧ Company will sponsor student for J-1 Visa
- ✧ Annual stipend of \$30,000 USD
- ✧ Standard medical, dental, and vision fully covered during internship
- ✧ Student is responsible for arranging housing and transportation to internship (company can provide information resources)
- ✧ Company will provide additional cultural enrichment so students will gain full experience of working at Silicon Valley Start up

- ✧ Company will provide executive level exposure for the student during the internship period

Interview process:

Please submit your resume to NTU Career Center (career@ntu.edu.tw). Company will review all resume and interview candidates via Skype or phone. Offers will be provided within 1 week after the interview calls.
